

ADAS CALIBRATION

VAS 6430/9 | Height Spacer

Article number: ASE 423 219 00 000

The VAS 6430/9 adapter is used for height compensation on above-ground lifts and is mounted between the base frame and the VAS 6430/1A base frame for this purpose. This makes it possible to calibrate the front cameras—which are installed very high on some transporter and LCV models—even at these measurement bays.

The height compensation adapter is compatible with both the VAS 6430/7 stationary base frame and the VAS 6430/8 mobile base frame.
