Description

The MT 826 Bike is an electronic wheel balancer designed for low to medium volume workshops. Thanks to the new extreme versatility and compact size design, the electronic wheel balancer is suitable for working in narrowest environments and with all types of car, motorcycle and lightweight transportation wheels.

Ultra-Compact

- Our most compact wheel balancer, perfectly equipped to handle all types of wheels up to 65kg and up to 820mm diameter
- Total of 11 balancing programs for passenger car, light truck, and motorcycle wheels (static and dynamic)
- Quickly switch from passenger car to motor cycles wheels

Enhanced Time Savings

- Automatic measuring procedure with dual LED display and LED direction arrows
- Wheel guard hoop with electric locking for automatic start

Optimal Total Cost of Ownership

- High price-performance ratio
- No service technician for calibration needed
- Robust pedal-operated brake to lock machine shaft when clamping wheel into position and attaching balance weights
- Simplified machine maintenance thanks to integrated calibrating and self-diagnostic software

Ergonomic Design and Easy Access

- Ergonomic wheel cover design
- Well thought-out weight compartments
- Many shelves for weights and tools
