

EASY TREAD 2.0

Training Tyre Scanner | Easy Tread & Connectivity Kit

Article number: DL6000012

High torque and heavy batteries lead to extreme tire wear, especially in electric vehicles. In addition to tread depth, we also assess uneven wear patterns as the vehicle drives over the system, allowing us to detect potential chassis and tire pressure issues within seconds.

In this course, we'll show you how to optimally integrate Easy Tread into a workshop, how to maximize service potential with a red report, and how a green report can build long-term customer loyalty.

Training content:

- Basics of Beissbarth tread depth measurement
- Commissioning, operation, and instruction
- Maintenance, repair, and service
- Display and visualization options in the workshop
- Integration options with the Connectivity Kit and networking basics
- Practical experience and troubleshooting

Course duration: 1,5 days

Requirements: None

The participation fee includes:

- One lunch per full training day
- Refreshments during breaks
- Training certificate

Any accommodation costs incurred are to be settled directly with the hotel by the participant. Feel free to contact us for recommendations.

Language: English

Max. number of participants: 8

Training location: Friedrichshafener Straße 602, 82205 Gilching

Please note that this course will only take place if there is a minimum of 3 participants.
