# INGROUND

Version 2026.05.12 – Prices on request

## License plate recognition Easy Cam | Inground

*EasyCam inground camera kit incl. centre cover*

**Article number: 1691200009**

## Foundation frame for Easy Tread and VAS 741083 RDS

*Foundation frame to be cemented in with filling pieces and socket for the EasyCam*

**Article number: 1691200010**

## Centre cover Easy Tread and VAS 741083 RDS

Cover panel for inground version without EasyCam

**Article number: 1691202069**

## Inground frame for Easy Tread and VAS 741083 RDS

*Inground frame to be cemented in with filling pieces and socket for the EasyCam. 200mm wider than standard inground frame*

**Article number: 1691200028**

## License plate recognition Easy Cam | Inground +200mm

*EasyCam inground camera kit incl. centre cover*

**Article number: 1691200027**

## Centre cover Easy Tread | Inground +200mm

Cover panel for inground version without EasyCam

Article number: 1691202095

## PC trolley for Easy Tread

*Trolley with PC, monitor, mouse, and keyboard (no printer included)*

**Article number: 1691200023**

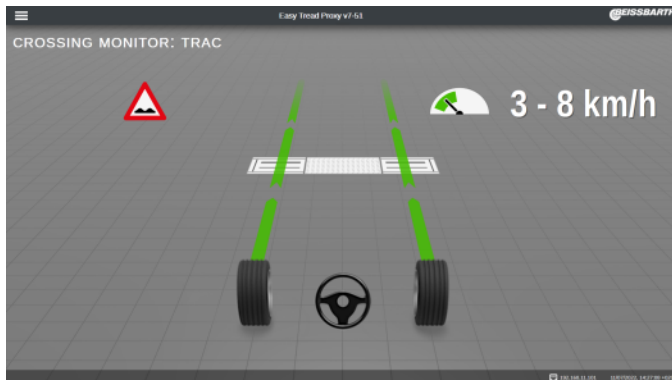

# Easy Tread - Connectivity Kit

Connectivity Upgrade Kit for easy integration into workshop networks, ASA connection, and cumulative display of values from multiple Easy Tread installations.

Article number: 1691200022

## A digital workshop requires digital processes, and tire diagnosis is no exception.

Particularly with electric vehicles, high weight and torque cause enormous wear on tires and chassis components. With the automatic tire diagnosis of every vehicle entering the workshop, you not only keep the tire business in your workshop, but also create a basis for strong customer loyalty by ensuring more safety. The immediate evaluation of the tire wear image simultaneously generates service opportunities for wheel alignment and, if necessary, subsequent calibration of driver assistance systems.

The Connectivity Upgrade Kit allows you to seamlessly integrate any number of Easy Tread systems into your workshop network, giving you full control over vehicles

## Connectivity Upgrade Kit:

- Live view of all crossings of multiple Easy Treads in the same workshop
- 20% faster reading
- Connectivity via ASA interface
- Simplified connection to local workshop network
- New interface for easy integration into third party systems
- Direct connection of monitors and TVs without using the browser
- Search function for license plates
- Cumulative statistics across multiple Easy Tread installations

## Live Monitor:

The Live Monitor displays results such as license plate, tread depth, uneven tire wear, potential air pressure problems, as well as statistics from multiple Easy Tread installations. This can be accessed from any device with a web browser. As a result:

- Increase tire sales
- Increase wheel alignment and, if applicable, subsequent ADAS calibrations
- Optimize workshop processes
- Improve customer satisfaction & transparency
- Reduce walking distances and printing costs

## More data, more knowledge:

Workshop and tire chains take note! Cumulate Easy Tread measurement values even across multiple workshops! Collect crossing information from decentrally spread locations in one central place and increase efficiency in your workshops:

- Capacities & Performance Tracking
- Availability & management of tires
- Sending measurement reports to customers
- Online consulting of customers about further service measures

## Automatic Cleaning Solution | Easy Tread

Article number: 1691200051

**Two-Stage Dirt Protection for Clear Results**The cleaning kit utilizes an intelligent two-stage strategy to keep the measurement modules clean:

- **Preventative Airflow:** As soon as the ANPR camera detects a vehicle license plate, a continuous airflow is activated. This prevents dirt, water, or small stones from reaching the optics before the vehicle even passes over.
- **Periodic Cleaning:** At freely configurable intervals (e.g., every two minutes), a powerful blast of air removes even the finest dust particles or leaves that might settle between measurements.

Gentle on Technology, Strong on Results

Cleaning with air offers a decisive advantage over mechanical methods: it is extremely gentle on materials. Scratching of the measurement optics is effectively prevented, significantly extending the hardware's lifespan. Workshops benefit from permanently high process reliability and uninterrupted system availability.

Simple Retrofitting for Existing Customers

Particularly customer-friendly: The upgrade is not only available for new devices but can also be easily integrated into existing Easy Tread installations. Technical Requirements:

- Compressed air connection (6-8 bar)
- Connectivity Kit for digital control (included as standard in all Easy Treads since 07/2022)

Note: Without an ANPR camera, only periodic cleaning is possible.
